MISSION

Jackson County Health Department provides public health services for disease prevention, health promotion and protection of the environment.

VISION

The population in Eastern Jackson County (EJC) will practice preventative behaviors that there are appropriate, have accessible public health services, with adequate staffing and resources and the citizens will be knowledgeable and proactive about public health and public health policy.

SERVICE AREA

The Jackson County Health Department (JACOHD) provides public health services to over 379,000 residents. Individuals served are primarily located in EJC, which is defined as all areas outside of Kansas City.

FROM OUR DIRECTOR

Bridgette Shaffer, MPH
Health Director

2018 was quite a year, full of new adventures and accomplishments.

Our jurisdiction expanded in July to include the city of Independence. We're truly excited to serve this city, and we look forward to seeing new relationships and opportunities arise in the coming years.

Another major highlight of 2018 was the completion of our first-ever Community Health Improvement Plan (CHIP) for EJC. This was based on the results of the Community Health Assessment (CHA) completed in 2017. The CHIP contains strategic issues that were identified by stakeholders, and the goals, objectives, and strategies they selected to address those issues. We can't wait to see how this tool will continue to help better the health of our county.

Additionally, we were very excited to receive funding from the Kresge Foundation to advance our mission of health equity. This grant will

help further develop the role of our department as a social determinant resource integrator and navigator for the health care system.

We're also on the path to national public health accreditation. In 2018, we assessed the department's readiness to pursue national public health accreditation, which is the first step in the process that will advance the quality and performance improvement of the department.

Looking ahead to 2019, we will use the data from our CHA and CHIP to undergo a strategic planning process. We hope that this process strengthens our operations, while also providing accountability to our residents and valued stakeholders.

It's been an incredible year, but as always, there's still more work to be done. With the help of community leaders and partners like you, we will continue building a healthier Jackson County.

Managed and operated by **TRUMAN MEDICAL CENTERS**

Eligibility criteria for acceptance and participation in the programs of this agency are administered on a nondiscriminatory basis regardless of race, color, national origin, age, sex, religion, genetic information, or disability.

HEALTH PROMOTIONS, PROGRAMMING, & POLICY

Health is more than a trip to the doctor's office.

In fact, only 20 percent of a person's health is tied to medical care; whereas 70% is tied to healthy behaviors and conditions, in which we live, learn, work, and play (County Health Rankings, [countyhealthrankings.org](https://www.countyhealthrankings.org)).

The Jackson County Health Department is working to ensure all residents have the opportunity to make the choices that allow them to live a long, healthy life, regardless of their income, education, or ethnic background.

We do this through case management, health promotion, programming, policy and systems change, and effective communication.

Above: Jessica, her fiancé, and their twin girls on the day she completed the Baby & Me - Tobacco Free program.

GOING TOBACCO FREE FOR TWINS

With double the reasons to quit smoking, Jessica joined the Baby & Me - Tobacco Free program in 2017 and has been smoke free ever since.

Jessica had two new reasons she needed to go tobacco free: her twin girls were on their way!

In August of 2017, Jessica started the Baby & Me - Tobacco Free Program, and she's been smoke free ever since.

The Baby & Me program provides counseling support and resources to pregnant women with the goal that they quit smoking and maintain smoking cessation throughout the postpartum period and beyond.

This program is successful in helping women like Jessica quit smoking and stay quit, resulting in improved birth outcomes and long-term positive outcomes for women, children, and their families.

In November, Jessica gave birth to her baby girls. She's never missed a monthly check-in, and has successfully remained smoke-free.

With great support from her fiancé, inspiration from her children, and lots of hard work and dedication, Jessica completed the program this past November. Her story is an inspiration and a great example to others.

Are you a Jackson county mom-to-be who's ready to quit smoking? Call our Maternal Child Health Coordinator at 816-404-6444.

PROGRAMS

Maternal and Child Health (MCH) initiatives in Eastern Jackson County are part of the Title V Maternal Child Health Block Grant from the Missouri Department of Health & Senior Services. Funds from this grant are distributed among a number of programs which target the improvement of prenatal services for women.

JACOHD's top MCH goal is to reduce the risks of pregnancy-related complications for mother and infant through early prenatal care. Program initiatives include smoking cessation among pregnant women, infant safe sleep, and ensuring everyone has access to health services.

The **Show Me Healthy Women (SMHW)** program is a statewide program funded by the Centers for Disease Control and Prevention, which provides education, screening, diagnostics, and case management related to breast and cervical cancer for low-income women ages 35-64.

The **WiseWomen (WW)** program is an extension of SMHW and focuses on cardiovascular disease risk factor reduction. Clients work with lifestyle counselors to determine their lifestyle behavior patterns focusing on changes with nutrition, physical activity, and smoking behaviors. WiseWomen serves women ages 40-64 receiving well women services from Show Me Healthy Women.

THE CALL THAT LED TO PAID-IN-FULL TREATMENT

A simple call on a summer day led one woman to financial and emotional support she didn't even know existed.

This past summer, a woman called the Jackson County Health Department looking for help. She had recently received abnormal results from a breast center in the area, and she needed a breast biopsy that she couldn't afford.

The SMHW Regional Case Manager was able to connect her with the TMC Lakewood coordinator who confirmed her eligibility for SMHW and enrolled her in the program.

The SMHW provider at TMC Lakewood gave her the diagnosis: unfortunately, it was cancer.

However, there was a silver lining: she was eligible to enroll in the MO HealthNet, under the Breast and Cervical Cancer Treatment Act.

This was all possible because she had a test paid for by SMHW before she was ever diagnosed.

The client was able to return to her original breast center for treatment, and she didn't have to worry about the financing.

During every step of the process, the client expressed her gratitude. The SMHW provider was simply honored that she was able to guide her through this stressful journey.

By partnering with individuals and organizations in the community, SMHW has helped many overcome the financial burden of healthcare.

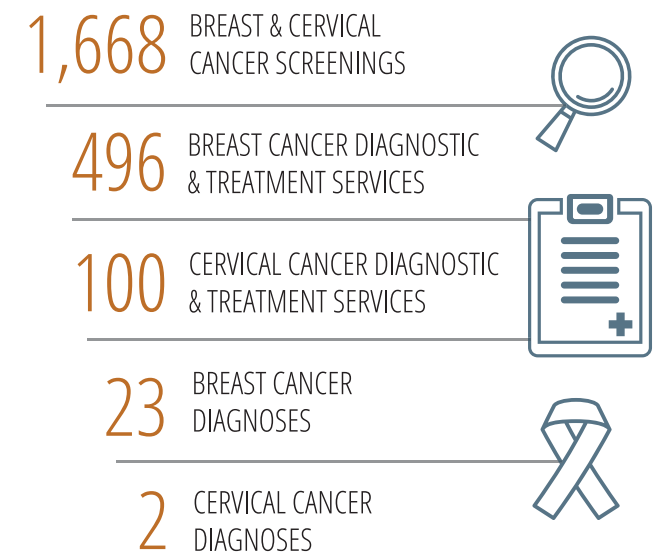

SERVICES PROVIDED THROUGH SMHW + WW

- **Breast and cervical cancer screening exams** (mammograms, pap smears, and clinical breast exams)
- **Cardiovascular screening exams** (body mass index, blood pressure, total cholesterol, blood glucose)
- **Diagnostic and treatment services** are available to women who are found to have an abnormality through screening
- **Case management / follow-up** for all clients
- **Intervention / education coordination** for group or individual sessions focusing on changing behaviors in reducing cardiac risk factors such as smoking cessation, increase physical activity, decrease fat intake, increase fruit and vegetable consumption

Plus, women who participate in WW health coaching are eligible for TOPS, Weight Watchers, Eating Smart Being Active classes, and other community based resources at **no cost**.

NW SMHW DISTRICT* SCREENING RATES

JUNE 30, 2017 - JUNE 29, 2018

*INCLUDES ATCHISON, HARRISON, GRUNDY, LIVINGSTON, BUCHANAN, CLINTON, PLATTE, CLAY, RAY, CARROLL, JACKSON, LAFAYETTE, BATES, AND HENRY COUNTIES

The Adult Brain Injury (ABI) program assists Missouri residents, ages 21 to 65, who are living with a traumatic brain injury (TBI).

Through service coordination, the program links individuals to resources that enable each person to obtain goals of independent living, community participation, and employment.

Individuals who meet financial eligibility requirements may also receive community-based rehabilitation services to help achieve identified goals. Rehabilitation services include counseling, vocational training, employment supports and home- and community-based support training.

THE ROLLER COASTER TO RECOVERY

It had been over seven years since Mark*, a participant in the ABI Program, had lived at home. Being forced to live with his parents again after being independent for so long caused tensions to rise. The environment quickly became unhealthy.

In order to resolve the family tension, Mark chose to move into a Residential Care Facility (RCF). The RCF level of care provides cleaning services, meal preparation, dispensing of medications, and curfews.

However, soon Mark started experiencing significant depression. He began drinking in excess, to the point that he was asked to leave the RCF.

Over the next few weeks, Mark made several suicide attempts and was hospitalized in several different facilities.

Finally, Mark was able to get the help he needed. The last treatment program he attended seemed to provide the right combination

of medications and therapeutic supports, and he has been doing well ever since.

The programs that are supporting his success now include a community mental health center, which is looking for a volunteer opportunity for him, per his request. He is establishing medical care with a primary care doctor and continuing his medication support. The ABI Program has been tying all of these supports together utilizing Case Management Support Services.

Now, Mark is looking forward to moving into his own apartment by the end of March 2019.

*Not participant's real name

TBI 2018 ACHIEVEMENTS

- Collaborated participants' services with more than **50 providers** in a **6 county** area
- **Attended 7 seminars** and conferences to provide resources and education about the program to approximately **1,500 people**
- **Completed a 3 year pilot program** with Department of Corrections and Department of Mental Health
- **Eliminated an approximate 2 year wait list** for participants to begin Rehabilitation Services.

CLIENTS SERVED ACROSS LOCATIONS

TBI SERVICES

- **Evaluation and assessment of needs**
- **Information/education** on the prevention of a TBI and the health effects of a TBI
- **Service plan of interventions** to meet the individuals needs
- **Case management / follow-up** for all clients
- **Assistance in locating/assessing services** such as: medical care, housing, counseling, transportation, rehabilitation, vocational training, and annual evaluations and updates

POLICY

- Began evaluating EJC communities' health policies. In 2019, JACOHD will compile the results into a final document that can be shared with each community and used to build an advocacy agenda that has policy goals to work towards.
- Initiated the **Buckner Walkability Project**, a comprehensive analysis of **walkability in the City of Buckner**. The project will inform the creation of a master plan for the city, including livable street considerations.
- Initiated analysis of city benefits and policies impacting **maternal and infant health**.

DATA & REPORTS

- Completed a study, **Comparing Availability and Accessibility of Condoms within Businesses across Suburban Communities**, evaluating availability and accessibility of condoms in businesses throughout EJC.
- Completed a report, **Climate Change in Jackson County: An Examination of the Health Impacts of Climate Change**, detailing vulnerable populations and possible health impacts associated with the changing climate.
- Completed two data briefs, **Examining Suicide in Eastern Jackson County** and **Examining Infant Mortality in Jackson County**.
- Revamped the **Health Data & Reports** section of the website to include interactive data sets on the Community Health Assessment and Flu data.
- Updated **Life Expectancy and Economic Vulnerability Index** for all census tracts in Eastern Jackson County.

ACCESS ALL REPORTS AND DATA BRIEFS ONLINE AT JACOHD.ORG!

PRESENTATIONS

- Presented the poster, **Comparing Availability and Accessibility of Condoms within Businesses across Suburban Communities**, at the American Public Health Association's national conference.
- Completed **34** community presentations on reports and data, healthy eating on a budget, community health, the opioid crisis, and general health promotion and education.
- Completed **15** community presentations on maternal child health topics.

MAPP PROCESS

In 2017, the Jackson County Health Department secured funding from the REACH Foundation and the National Association of County and City Health Officials to implement the first-ever strategic community health improvement process in EJC. The Mobilizing for Action through Planning and Partnerships process (MAPP) is a community-driven strategic planning tool that can improve the performance of health outcomes and local public health systems.

In 2018, the following actions have been taken:

- Completed a collaborative strategic issues identification meeting.
- Completed EJC's first-ever Community Health Improvement Plan (CHIP).
- Completed an Implementation and Evaluation plan for the CHIP.
- Facilitated 7 CHIP **Access to Affordable Health Care** workgroup meetings, 6 CHIP **Mental and Behavioral Health** workgroup meetings, and 6 CHIP **Overweight and Obesity** workgroup meetings for action planning.

CLINICAL SERVICES

Disease prevention is our number one priority.

The Clinical Services division provides a variety of services, including:

- All required and recommended vaccinations for clients of all ages
- Travel vaccines and malaria prescriptions
- Tuberculosis (TB) skin tests
- Sexually Transmitted Infection assessment and treatment
- HIV testing
- Pregnancy testing
- Hearing, vision, and scoliosis screenings to select schools
- Camp, sports, and pre-K physicals
- Hands-on CPR checkoffs per American Heart Association standards

5 REASONS WHY VACCINATIONS ARE IMPORTANT

The CDC gives 5 reasons to vaccinate:

- 1 Immunizations can save your child's life.**
 Some diseases that once injured or killed thousands of children are no longer common in the U.S. – primarily due to safe and effective vaccines.
- 2 Vaccination is safe and effective.**
 Vaccines are only given to children after careful review by scientists, doctors, and healthcare professionals.
- 3 Immunizations protect those you care about.**
 It is important that you and your children who are able to get vaccinated are fully immunized. This not only protects your family, but also helps prevent the spread of these diseases to your friends and loved ones.
- 4 Immunizations can save your family time and money.**
 Some vaccine-preventable diseases can result in prolonged disabilities and can take a financial toll because of lost time at work, medical bills or long-term disability care.
- 5 Immunization protects future generations.**
 Vaccines have reduced and, in some cases, eliminated many diseases that killed or severely disabled people just a few generations ago.

15,900 IMMUNIZATIONS
 2,615 FLU SHOTS

11,750 CLIENTS SEEN

40 PREGNANCY TESTS

Travel clinic services are also provided to our clients that travel out of the United States to ensure they are safely vaccinated against foreign borne diseases. We provide onsite and offsite vaccinations to local schools, businesses, community service organizations, and homeless shelters.

OFFSITE VACCINATION CLINICS
 76 FLU
 19 SPRING (PRE-ENROLLMENT)
 11 BACK TO SCHOOL ENROLLMENT

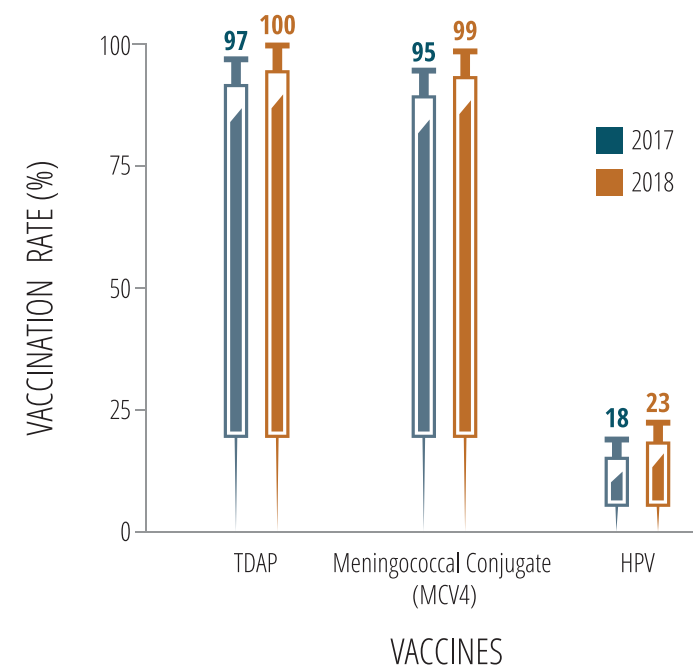

736 SEXUALLY TRANSMITTED INFECTIONS / DISEASE (STI / STD) SCREENINGS / EXAMS

The Sexually Transmitted Infection/Disease clinic provides confidential testing, education, and treatment.

231 LEAD CASES MANAGED
 Lead Case Management staff provides resources for families for follow-up care, home testing, and education for a safe and healthy environment. The child's blood levels are tracked until they fall back within normal range.

49 HIV TESTS
 1,306 TB SKIN TESTS

Partnered with the Jackson County Sheriff Department to provide free backpacks, free school supplies, free food, free haircuts, and low cost vaccinations at the annual Back-to-School Bash held at Osage Trail Middle School.

COMMUNICABLE DISEASE AND EPIDEMIOLOGY

The Communicable Disease and Epidemiology team investigates reports of communicable diseases (illnesses or infections that can be spread through the environment by people, animals, air, water, food, etc.) in EJC to help identify and control the spread.

Communicable diseases are investigated through timely reporting of suspected cases done by healthcare providers, schools, and citizens. Reports of communicable disease are investigated by epidemiology specialists to determine case status.

A LOOK AT INFLUENZA IN 2018

The **2017-2018** flu season (August 2017-May 2018) was a high-severity season. There was a high burden of disease for influenza-like illness (ILI), high influenza-related hospitalization rates, and elevated and geographically widespread influenza activity for an extended period.

Nationally, the 2017-2018 season was the first season to be classified by the CDC as high severity across all age groups. Severity is assessed by measuring the percentage of visits to outpatient clinics for ILI, the rates of hospitalizations associated with the flu, and the percentage of deaths that resulted from pneumonia or influenza.

The **2018-2019** flu season began in August 2018 and has been significantly less severe than the 2017-2018 flu season.

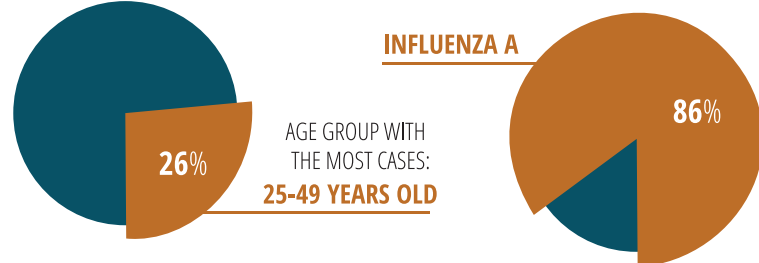

2017-2018 FLU SEASON (AUGUST 2017 - MAY 2018)

 **8,150** INFLUENZA CASES  **992** MOST CASES IN ONE WEEK (TOOK PLACE DURING JANUARY 2018)

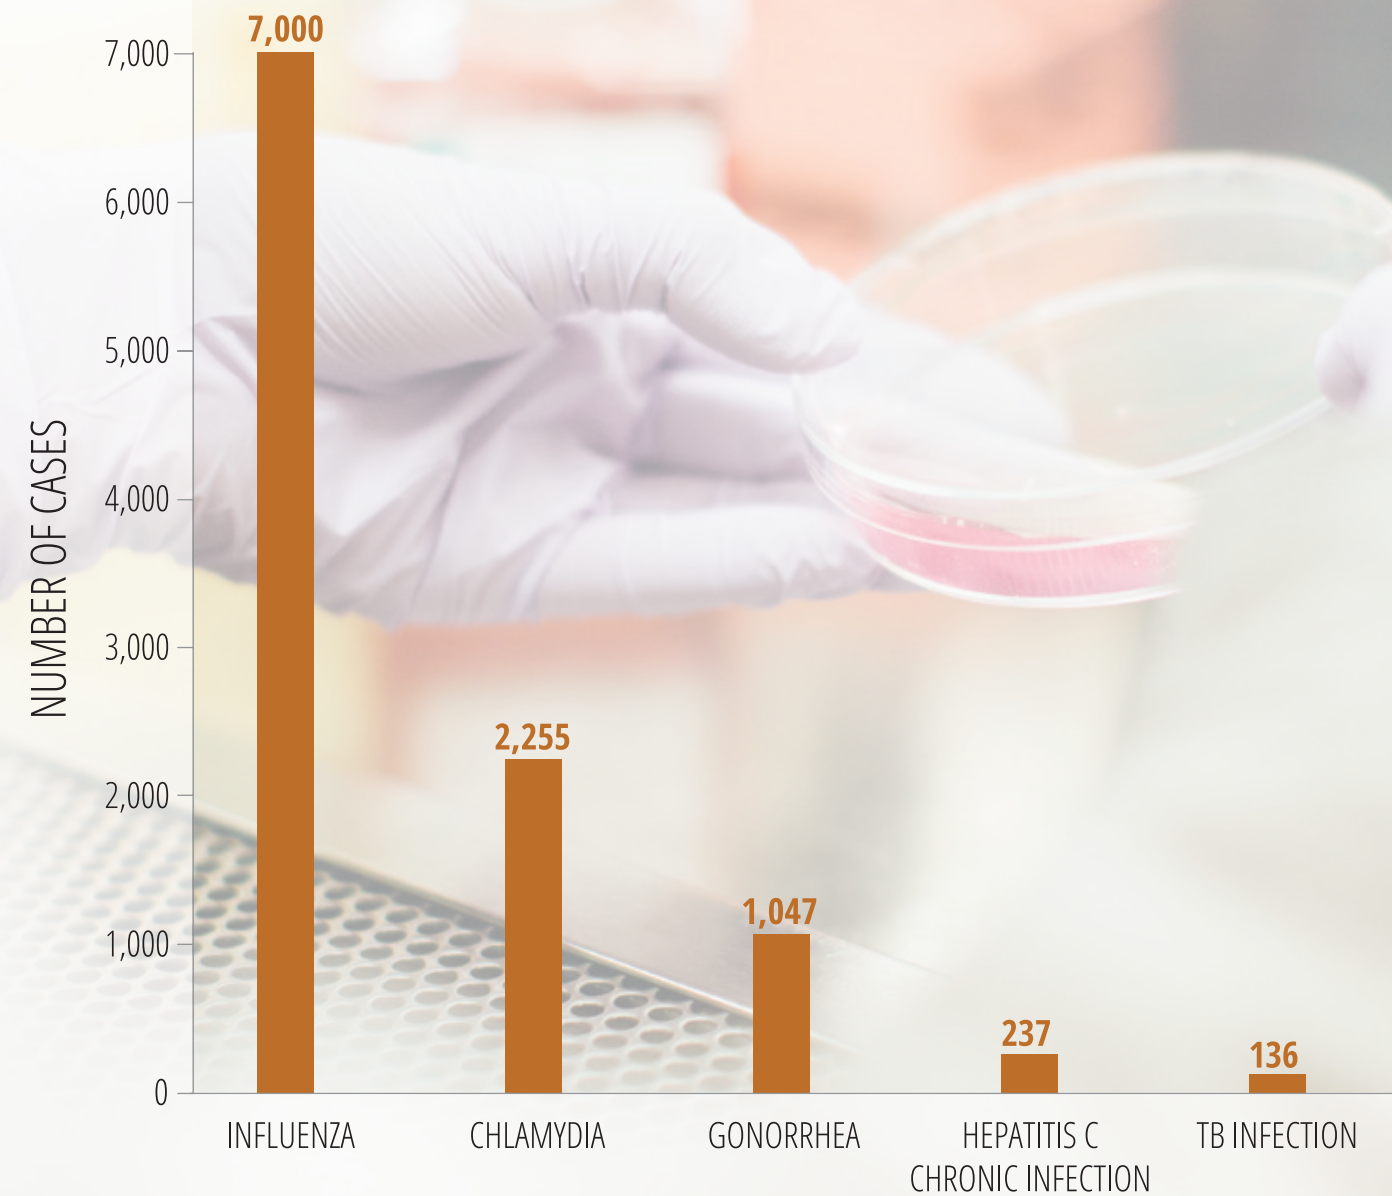

2018-2019 FLU SEASON (BEGAN AUGUST 2018; DATA AS OF JANUARY 18, 2019)

 **418** INFLUENZA CASES  **91** MOST CASES IN ONE WEEK (WEEK OF DECEMBER 23, 2018)

CASE COUNTS OF MOST COMMON REPORTABLE COMMUNICABLE DISEASES EASTERN JACKSON COUNTY, 2018

PUBLIC HEALTH EMERGENCY PREPAREDNESS

A public health emergency is any threat to the public's health or safety, such as a naturally occurring infectious disease outbreak, a natural disaster, a bioterrorism attack, or any event that has the potential for significant health impact to the community.

EMERGENCY PREPAREDNESS CAPABILITIES

Each year, the Jackson County Health Department selects initiatives to drive emergency preparedness goals.

By selecting specific concepts, called capabilities, the health department is able to focus on a thorough approach to revamping preparedness operations in EJC.

In 2018, the health department focused on Community Preparedness, Medical Countermeasure Dispensing, and Medical Materiel Management and Distribution. Here's a look at what each of these capabilities entails:

Community Preparedness

Community preparedness is the ability of communities to prepare for, withstand, and recover — in both the short and long terms — from public health incidents. Public health departments engage and coordinate with emergency management, healthcare organizations (private and community-based), mental/behavioral health providers, community, and faith-based partners.

Medical Countermeasure Dispensing

Medical countermeasure dispensing is the ability to provide medical countermeasures (including vaccines, antiviral drugs, antibiotics, antitoxin,

etc.) in support of treatment or prophylaxis (oral or vaccination) to the identified population in accordance with public health guidelines and/or recommendations.

Medical Materiel Management and Distribution

Medical materiel management and distribution is the ability to acquire, maintain, transport, distribute, and track medical materiel during an incident and to recover and account for unused medical materiel, as necessary, after an incident.

FULL-SCALE BIOTERRORISM EXERCISE CONDUCTED

In March 2018, the Jackson County Health Department collaborated with other Kansas City metro area health departments in an exercise to simulate the emergency response in the event of an anthrax attack taking place in the KC metro area. This event culminated with each jurisdiction hosting a full-scale exercise in mass prophylaxis.

The Jackson County Health Department exercise was located at the John Knox Village pavilion in Lee's Summit, Missouri. This exercise allowed us to simulate all aspects of emergency response, from determining population affected, setting up a Point of Dispensing site, assigning staff to tasks and providing Just-In-Time training, and testing throughput of mass prophylaxis capabilities.

CONTINUITY OF OPERATION TABLETOP

In April 2018, the Jackson County Health Department conducted a tabletop exercise regarding the Continuity of Operations (COOP) Plan. The COOP Plan outlines the procedures to be followed in order to ensure that primary functions of the health department continue during a wide range of emergencies, including localized acts of nature, accidents, or technological attacks.

This tabletop exercise was conducted in conjunction with the State of Missouri as well as members of the emergency preparedness team from the city of Independence.

OPERATIONS

Providing daily support to the health department.

The Operations Division guides day-to-day operations, including Vital Records, Accounting, Medical Records Management, Facilities, and Purchasing. The goal of the Operations Division is to support the Jackson County Health Department by:

- Providing outstanding service to all vital records clients of JACOHD
- Ensuring the fiscal integrity and accountability of the health department
- Providing a safe and supportive environment
- Assuring well-maintained buildings and grounds

*feeling your
empathy meant all
the world to me*

MAKING A DIFFERENCE

The strength of the Operations Division at the Jackson County Health Department continues to be the dedicated and caring employees that perform a wide range of services throughout the department.

Recently one of our Vital Records employees received a note from a client thanking her for her help. The client said, "feeling your empathy meant all the world to me."

That is how we strive to treat all clients, whether they are here for birth or death certificates or they need help navigating a bill they received.

If you need a Missouri birth or death certificate, or assistance with a medical bill, please do not hesitate to call the Operations division.

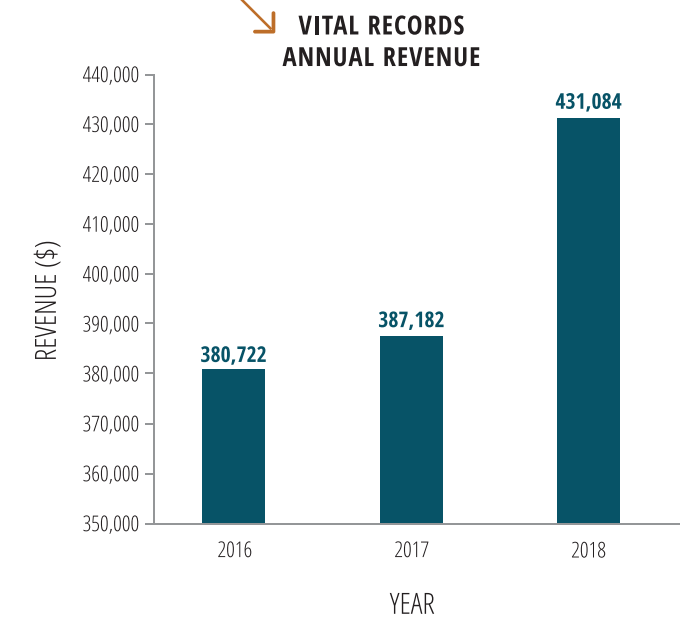

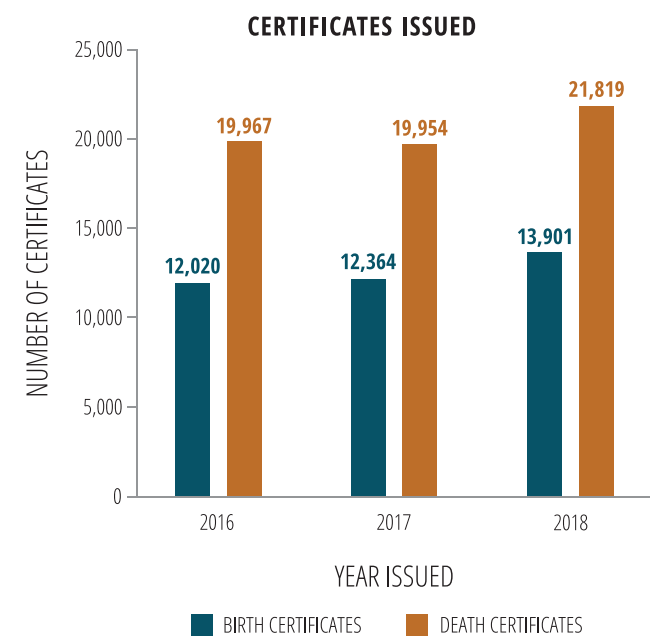

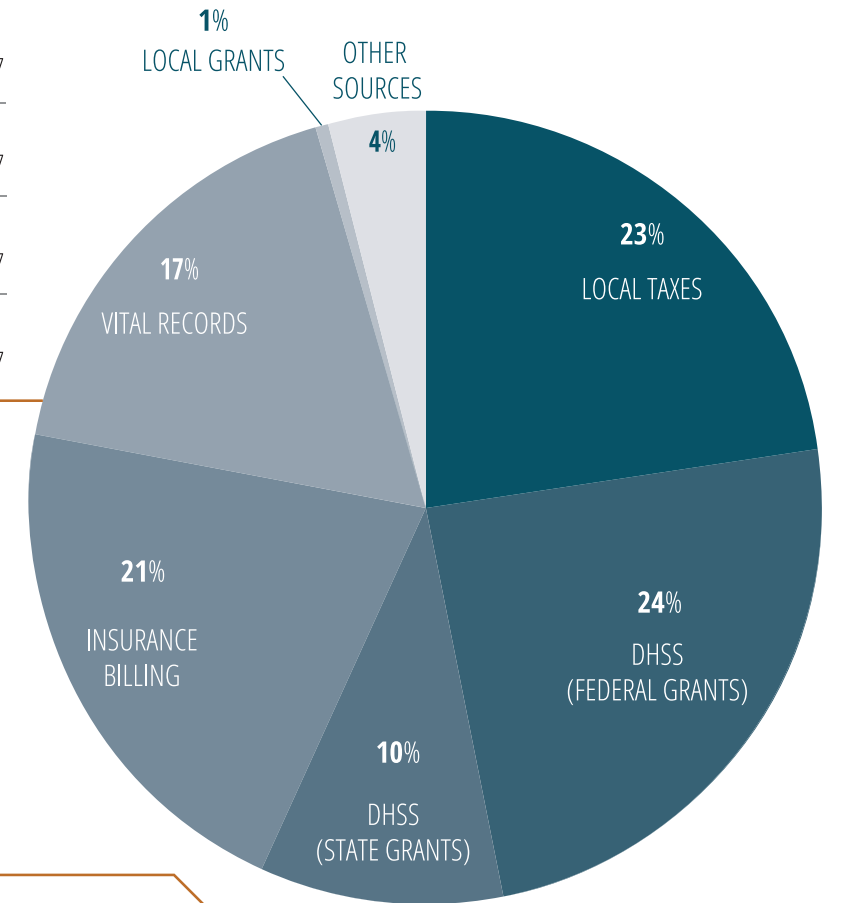

2018 FISCAL YEAR REVENUE

FISCAL YEAR (FY) 2018 TOTAL BUDGET **\$2,323,312** **3.7% ↓** FROM FY 2017
